

UOW ONLINE INNOVATION GALLERY

Showcasing Bright Ideas from Brilliant Minds.

THE PROBLEM

Students and innovators at UOW create amazing projects – but many never get seen beyond the classroom. There's no central place to showcase them to the world.

THE GOAL

To create an online gallery that highlights UOW's innovation, making student work visible to industry, investors, and the wider community.

TRY IT YOURSELF!

See student innovation in action.

KEY FEATURES

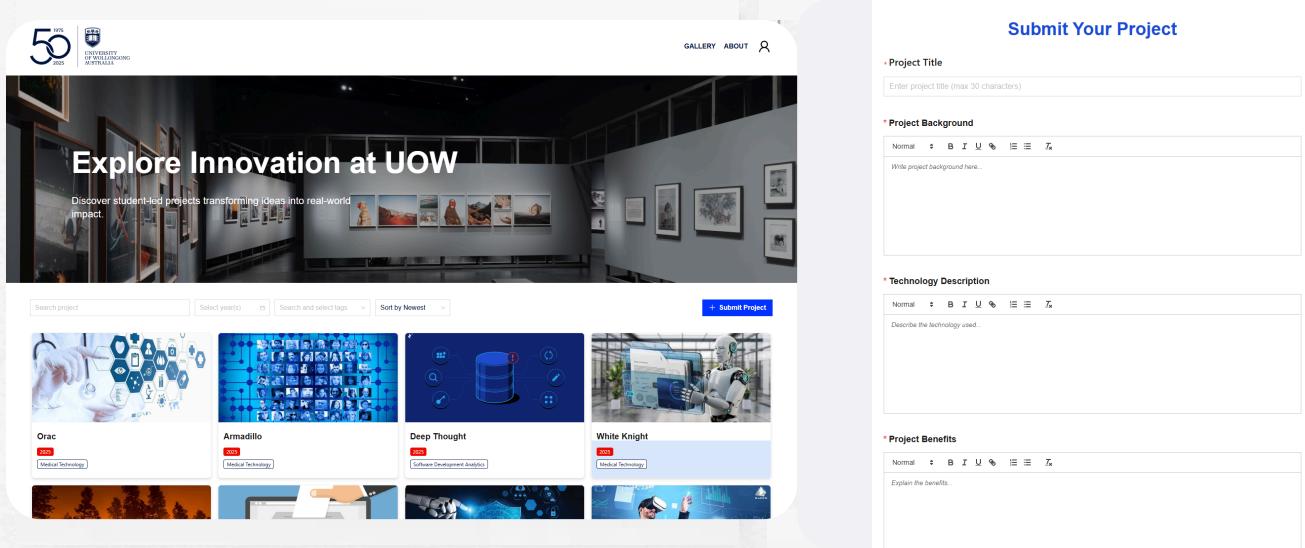

- Browse innovative Projects
- Submit & Manage Your Work
- Admin Review & Approval System
- Tag-based Filtering & Search
- Collaborator & Year Metadata
- Powered by AWS Amplify & React

WHY IT MATTERS

- Empowers students to showcase work beyond the classroom
- Connects talent with industry opportunities
- Strengthens the UOW innovation ecosystem

About the Project

The innovation Gallery is an online platform for showcasing innovative projects by University students.

The screenshot shows the 'Submit Your Project' page of the innovation Gallery. At the top right, it says 'Submit Your Project'. Below that are four sections: 'Project Title' (with a placeholder 'Enter project title (max 30 characters)'), 'Project Background' (with a rich-text editor and placeholder 'Write project background here...'), 'Technology Description' (with a rich-text editor and placeholder 'Describe the technology used...'), and 'Project Benefits' (with a rich-text editor and placeholder 'Explain the benefits...'). To the left of the form, there's a preview of the innovation Gallery homepage featuring a banner with 'Explore Innovation at UOW' and several project cards like 'Orac', 'Armadillo', 'Deep Thought', and 'White Knight'.

Technologies Used

Next.js

React

AWS Amplify

Ant Design

TailwindCSS

STUDENT-LED & INDUSTRY-FOCUSED

Created by UOW students to connect innovation with real-world impact.
